2022 Formulary (List of Covered Drugs)

PLEASE READ: THIS DOCUMENT CONTAINS INFORMATION ABOUT THE DRUGS WE COVER IN THIS PLAN

Formulary File ID#22405, Version Number 5

This formulary was updated on 8/5/2021. For more recent information or other questions, please contact Harvard Pilgrim's Member Services at 1-888-609-0692 or, for TTY users 711, October 1 - March 31, 8 a.m. - 8 p.m., 7 days a week, and April 1 - September 30, 8 a.m. - 8 p.m., Monday - Friday, or visit www.harvardpilgrim.org/medicare.

Note to existing members: This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

When this drug list (formulary) refers to "we," "us", or "our," it means Harvard Pilgrim Health Care. When it refers to "plan" or "our plan," it means StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS).

This document includes the list of the drugs (formulary) for our plan which is current as of 8/5/2021. For an updated formulary, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You must generally use network pharmacies to use your prescription drug benefit. Benefits, formulary, pharmacy network, and/or copayments/coinsurance may change on January 1, 2022, and from time to time during the year.

What is the StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS) Formulary?

A formulary is a list of covered drugs selected by our plan in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Our plan will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a plan network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

Can the Formulary (drug list) change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the Drug List during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow Medicare rules in making these changes.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **Drugs removed from the market.** If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.
- **Other changes.** We may make other changes that affect members currently taking a drug. For instance, we may add a new generic drug to replace a brand name drug currently on the formulary or add new restrictions to the brand name drug or move it to a different cost-sharing tier or both. Or we may make changes based on new clinical guidelines. If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 30-day supply of the drug.
 - If we make these other changes, you or your prescriber can ask us to make an exception and continue to cover the brand name drug for you. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled "How do I request an exception to the StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS) Formulary?"

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2022 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2022 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the Drug List for the new benefit year for any changes to drugs.

The enclosed formulary is current as of **8/5/2021**. To get updated information about the drugs covered by our plan, please contact us. Our contact information appears on the front and back cover pages.

In the event of a mid-year, non-maintenance formulary change, we will notify you in your monthly Explanation of Benefits and on our website, www.harvardpilgrim.org/striderx.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 1. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, Cardiovascular Drugs. If you know what your drug is used for, look for the category name in the list that begins on page 1. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that follows the drug list. The Index provides an alphabetical list of all of the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

Our plans cover both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** Our plans require you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from us before you fill your prescriptions. If you don't get approval, our plans may not cover the drug.
- **Quantity Limits:** For certain drugs, our plans limit the amount of the drug that we will cover. For example, our plans provide 4 tablets per prescription for alendronate 70mg (generic Fosamax). This may be in addition to a standard one-month or three-month supply.
- **Step Therapy:** In some cases, our plans require you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, our plans may not cover Drug B unless you try Drug A first. If Drug A does not work for you, our plans will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 1. You can also get more information about the restrictions applied to specific covered drugs by visiting our Web site. We have posted online documents that explain our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask us to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat your health condition. See the section, "How do I request an exception to the StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO) and StrideSM Choice Rx (HMO-POS) formulary?" below for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Member Services and ask if your drug is covered.

If you learn that our plans do not cover your drug, you have two options:

- You can ask Member Services for a list of similar drugs that are covered by our plans. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by us.
- You can ask us to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS) Formulary?

You can ask us to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to cover a formulary drug at a lower cost-sharing level, unless the drug is on the specialty tier. If approved, this would lower the amount you must pay for your drug.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, our plans limit the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.

Generally, we will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower cost-sharing drug or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary, tier, or utilization restriction exception. **When you request a formulary, tier or utilization restriction exception you should submit a statement from your prescriber or physician supporting your request.** Generally, we must make our decision within 72 hours of getting your prescriber's supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get a supporting statement from your doctor or other prescriber.

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your doctor to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 30-day supply of medication. After your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

If during your membership you experience a change in your level of care, including being admitted to, or discharged from, a hospital or long-term care facility, we will cover a 31-day emergency supply of a drug that is either not on our formulary or has requirements or limits. This temporary supply will give you time to talk to your doctor about other treatment options or to request an exception. For more information about our Transition Policy, visit our website, www.harvardpilgrim.org/striderx.

StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS) Formulary

The formulary that begins on page 1 provides coverage information about the drugs covered by StrideSM Basic Rx (HMO), StrideSM Value Rx (HMO), StrideSM Value Rx Plus (HMO), and StrideSM Choice Rx (HMO-POS). If you have trouble finding your drug in the list, turn to the Index that follows the drug list. Only drugs that are covered on the formulary are listed.

The first column of the chart lists the drug name. Brand name drugs are capitalized (e.g., XARELTO) and generic drugs are listed in lower-case (e.g., simvastatin). For generic drugs, we have listed the brand name equivalent in the second column for your reference only. If the brand name drug is not also listed in capital letters, it is not covered by our plan.

The information in the Requirements/Limits column tells you if our plans have any special requirements for coverage of your drug.

The following symbols and abbreviations describing utilization management restrictions and other special requirements may be found within the body of this document.

SYMBOL	DESCRIPTION	EXPLANATION
AGE (Max 64 Years)	Age Restriction	If you are 65 years of age or older, you (or your physician) are required to get prior authorization from our plan before we will cover this drug. This requirement is in place due to safety concerns with using this drug in people over that age. Prior authorization is not required for members 64 years of age or younger.
EX	Excluded Part D Drug	This prescription drug is not normally covered in a Medicare Prescription Drug Plan. The amount you pay when you fill a prescription for this drug does not count towards your total drug costs (that is, the amount you pay does not help you qualify for catastrophic coverage). In addition, if you are receiving extra help to pay for your prescriptions, you will not get any extra help to pay for this drug.
GC	Gap Coverage	We provide additional coverage of this prescription drug in the coverage gap. Please refer to our Evidence of Coverage for more information about this coverage. You pay your copay of \$0 for drugs on Tier 1 until you reach the Catastrophic Coverage stage.
PA	Prior Authorization Restriction	You (or your physician) are required to get prior authorization from our plans before we will cover this drug.
PA BvD	Prior Authorization Restriction for Part B vs Part D Determination	This drug may be eligible for payment under Medicare Part B or Part D depending on the circumstances. You (or your physician) may need to submit information describing the use and setting of the drug to make the determination.
PA NSO	Prior Authorization Restriction New Starts Only	If you are a new member or if you have not taken this drug before, you (or your physician) are required to get prior authorization from our plans before you fill your prescription for this drug. Without prior approval, we may not cover this drug.
QL	Quantity Limit Restriction	Our plans limit the amount of this drug that is covered within a specific time frame, or per prescription.
SI	Select Insulin	This select insulin is covered at a flat \$35 copayment for a 30-day supply during the Deductible, Initial Coverage Limit and Coverage Gap stages of your Part D benefit.
ST	Step Therapy Restriction	Before we will provide coverage for this drug, you must first try another drug(s) to treat your medical condition. This drug may only be covered if the other drug(s) does not work for you.

Coverage Notes

Coverage of Excluded Drugs

Our plans cover certain drugs that are excluded from coverage under Medicare Part D. Please refer to the table on page VII that describes "Other Special Requirements for Coverage" for important information about these drugs. Of these drugs, the most commonly used are those for the treatment of erectile dysfunction, such as sildenafil (generic Viagra). Our plans do not cover the lower daily dose of tadalafil (2.5mg and 5mg) for the treatment of erectile dysfunction. Those strengths are only covered under Part D with prior authorization for diagnoses other than erectile dysfunction.

Diabetic Testing Supplies

Diabetic testing supplies, including test strips, lancets, and glucose meters, are covered under the plan's medical benefit at participating retail or mail-order pharmacies. Coverage of test strips and glucose meters is limited to those made by Abbott Diabetes Care and to quantities of 204 test strips per 30 days and 1 glucose meter per 365 days. Authorization is required for coverage of other brand test strips or glucose meters or for quantities of Abbott Diabetes Care brand test strips or glucose meters in excess of the limits stated above when purchased at a retail or mail-order pharmacy. The Freestyle Libre system is covered through pharmacy with prior authorization. You can request coverage by contacting our Member Services at the number listed on the front and back covers of this booklet.

Extended Day Supplies

Drugs covered on all tiers are eligible for extended day supplies (up to 90 days) at participating network retail, specialty and mail order pharmacies.

Programs to Support the Safe Use of Opioids

Harvard Pilgrim Health Care is committed to supporting the safe and appropriate use of opioid pain medications, such as oxycodone and hydrocodone. To help with these efforts, we use a variety of programs and safeguards at the pharmacy when you fill your medications. The edits below will stop your prescription from being approved at the pharmacy when the conditions described are met. In these situations, we ask the pharmacist to consult with your prescriber to verify the appropriateness of the prescribed medication(s). If you or your prescriber do not think these limitations are right for your situation, you can ask us to cover your drug by contacting our Member Services.

- **Opioid Care Coordination Safety Edit**

Quantity limits apply to most of the individual opioid medications on our formulary. For example, we might limit coverage of an opioid to 60 tablets per 30 days. In addition to quantity limits applying to individual drugs, we apply additional quantity limits across all drugs in the opioid class when members fill prescriptions for high doses of opioids. The Opioid Care Coordination Safety Edit calculates the total dose of opioid drugs prescribed for you on the date you fill a prescription for an opioid medication. If your provider(s) prescribes more than 90 morphine milligram equivalents (MME) per day, your claim will not approve without an override.

- **Opioid – Benzodiazepine Concurrent Use Edit**

If you are prescribed both an opioid and benzodiazepine (e.g. lorazepam, diazepam), your claim will not approve without an override.

- **Opioid-Buprenorphine Concurrent Use Edit**

If you have filled a prescription for buprenorphine for medication-assisted treatment (MAT), your claim for an opioid will not approve without an override.

- **Opioid Naïve Day Supply Limitation**

When you fill a prescription for an opioid medication for the first time (you have not filled a prescription for an opioid in the previous 120 days), we will limit your fill to a 7-day supply.

- **Duplicative Long-Acting Opioid Edit**

When you fill prescriptions for two or more long-acting, your claim will not approve without an override.

To obtain an override, your pharmacist can contact our Pharmacy Help Desk, or you or your prescriber can call our Member Services and a representative will be happy to assist you.

Specialty Pharmacy

As a Harvard Pilgrim StrideSM member you have the flexibility of filling your medications at the network pharmacy of your choice. If you pay a coinsurance for your specialty medication, your out of pocket costs may be lower should you choose to fill your specialty medication with CVS Specialty Pharmacy. Medications available through CVS Specialty Pharmacy are identified in our drug list with the following note: "Available through CVS Specialty (1-800-237-2767)."

Other Pharmacies are available in our network. Information about what other pharmacies are available in our network can be accessed from the Harvard Pilgrim Health Care Pharmacy Directory (available on our website or by request), or by calling our Member Services at 1-888-609-0692 or TTY 711.

Representatives are available from October 1 - March 31, from 8 a.m. to 8 p.m., 7 days a week and from April 1 - September 30, from 8 a.m. to 8 p.m., Monday through Friday.

Topical Compounds

Prescriptions for compounded medications that are applied topically, or to the skin, are not covered by our plans. Just as with other drugs not included in this formulary (list of covered drugs), you can ask us to make an exception and cover your drug by calling our Member Services.

Vaccines

Our plans cover the flu and pneumonia vaccines under Part B at no cost-share. The hepatitis B vaccine may be covered under Part B or Part D, depending on your risk of becoming infected with hepatitis B. All other vaccines are covered under your Part D benefit on Tier 1. This means that there is no cost to you for your vaccines unless you are in the Catastrophic Coverage stage. The easiest way to receive a vaccine is at a network pharmacy where your cost-sharing (if any) will be determined at the time of administration. When you get a Part D-covered vaccine outside of a network pharmacy, your provider will bill you for both the vaccine and its administration. You can then pay your provider and submit a request for reimbursement to our Pharmacy Benefits Manager (PBM), OptumRx. Member Services can direct you to the form for reimbursement.

What you pay for your Part D prescription drugs

The costs below are for a 30-day supply at a plan's network pharmacy. For more information about what costs determine when you move from one coverage stage to the next, refer to your Evidence of Coverage.
